MARKET POSITION

Mid-Market

Based on catalog median price (simple heuristic).

PROMO INTENSITY

Medium

58

Blend of discounted share + median discount depth.

LAUNCH VELOCITY

Low

41

Blend of new product + update activity (last 90 days).

CATALOG COMPLEXITY

Medium

58

Blend of catalog size + price spread + variants.

Key Insights

- Moderate launch velocity: 5.0 products/month, showing steady growth.
- Consistent positioning: New products (90d) at \$75.0 vs catalog \$70.0 (+7% delta).
- 84.73% of products are currently in stock, which suggests stable inventory.
- 64.09% of products show valid discounts (compare-at > price), indicating aggressive promotion.
- Pricing spans \$2.00–\$160.00 with a median of \$70.00. Position your core offer near the median to compete directly.
- The dominant price band is \$50–\$99 (35.25% of products), showing where they primarily compete.
- Newest products skew above the store median price, suggesting a premium expansion strategy.
- Products have multiple variants on average, suggesting upsell/option strategy (sizes, bundles, tiers).

Data Coverage & Limitations

- Update activity may be inflated: 100.0% of meaningful updates occurred on 2026-05-05. Spike detected, but filtering would remove nearly all updates—showing meaningful updates instead.
- This report is based only on the public Shopify product catalog endpoint (/products.json). It does not include traffic, conversion rate, ads, or checkout data.
- Date coverage: 100.0% of products include created/published dates; 100.0% include updated_at.
- Pricing coverage: 100.0% of products include a usable price.
- Discount coverage: 64.09% include compare-at pricing fields (discounts only count when compare_at > price).
- If a store returns HTML/404 for /products.json, it may be non-Shopify, headless Shopify with restrictions, or intentionally blocking the endpoint.
- Data source: public Shopify /products.json endpoint.
- Safety cap: up to 10 pages × 250 products (max ~2,500 products).
- Discounts are counted only when compare_at_min > price_min.
- This report does not infer traffic, conversion rate, or revenue.
